INTERNET OF THINGS

BATCH : B3-3M5E

ASSIGNMENT NO : 2

NAME : RANJENI G

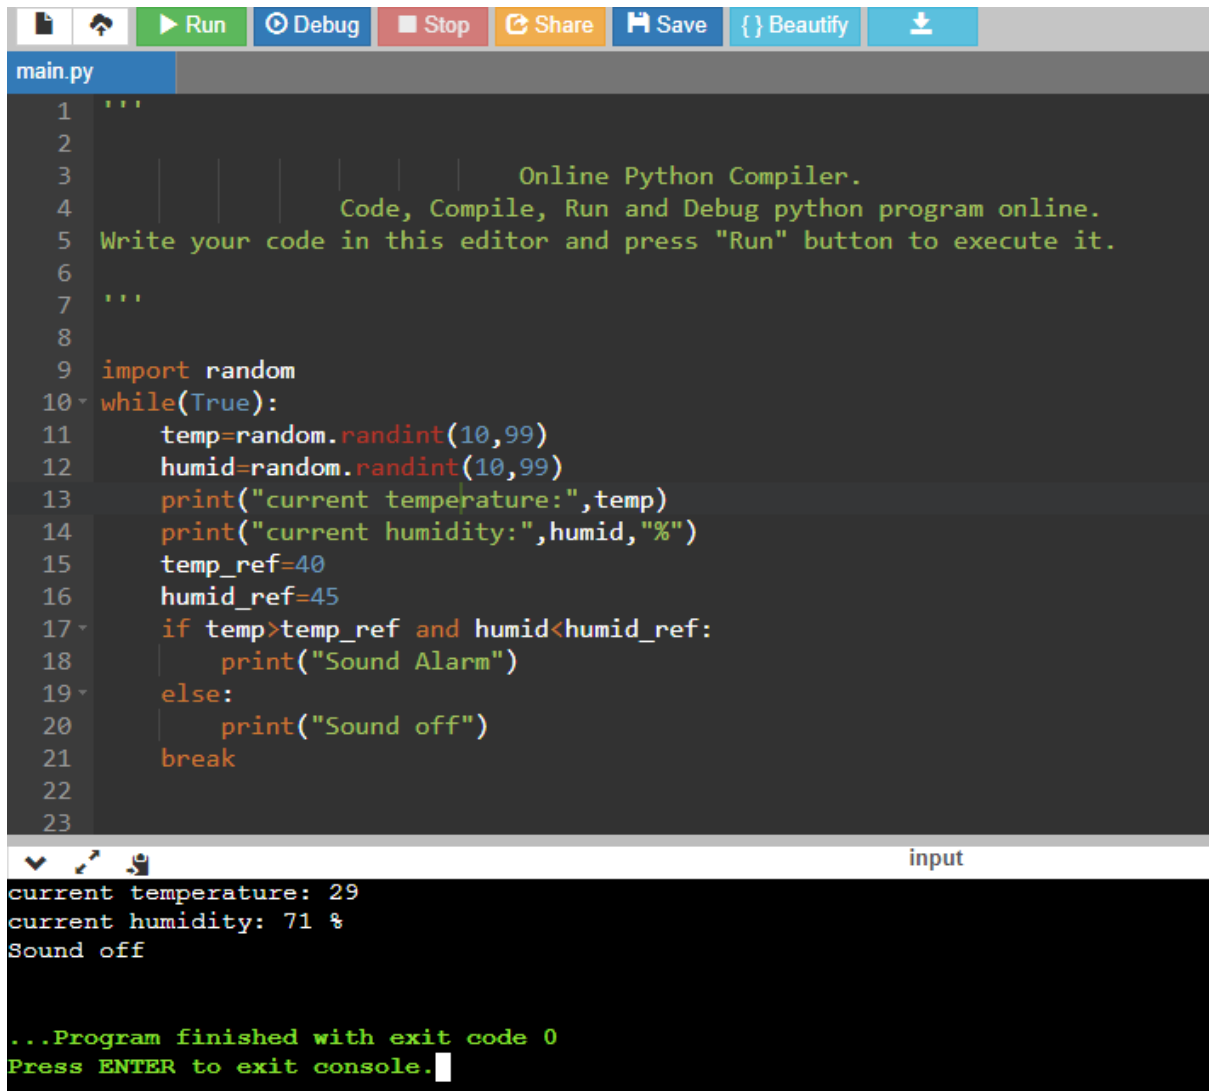

ASSIGNMENT QUESTION:

Build a python code. Assume u get temperature and humidity values and write a condition to continuously detect alarm in case of high temperature

CODE:

```
import random
while(True):
    temp=random.randint(10,99)
    humid=random.randint(10,99)
    print("current temperature:",temp)
    print("current humidity:",humid,"% ")
    temp_ref=37
    humid_ref=35
    if temp>temp_ref and humid<humid_ref:
        print("Sound Alarm")
    else:
        print("Sound off")
    break
```

OUTPUT:

The screenshot displays an online Python compiler interface. At the top, there is a toolbar with buttons for 'Run', 'Debug', 'Stop', 'Share', 'Save', 'Beautify', and a download icon. Below the toolbar, the file name 'main.py' is shown. The code editor contains a Python script that generates random temperature and humidity values and checks if they trigger an alarm. The output console at the bottom shows the results of the execution.

8
9 import random
10 while(True):
11     temp=random.randint(10,99)
12     humid=random.randint(10,99)
13     print("current temperature:",temp)
14     print("current humidity:",humid,"%")
15     temp_ref=40
16     humid_ref=45
17     if temp>temp_ref and humid<humid_ref:
18         print("Sound Alarm")
19     else:
20         print("Sound off")
21     break
22
23
```

input

```
current temperature: 29
current humidity: 71 %
Sound off

...Program finished with exit code 0
Press ENTER to exit console.
```
